NEW QUESTION: 3

You are the project manager of the GHY Project. This project is scheduled to last for one year and has a BAC of \$4,500,000. You are currently 45 percent complete with this project, though you are supposed to be at your second milestone, which accounts for half of the project completion. There have been some errors in the project, which has caused you to spend \$2,073,654. What is this project's planned value?

- A. There is not enough information to know
- B. \$4,500,000
- C. \$2,025,000
- D. \$2,250,000

Answer: D

Explanation:

Explanation/Reference:

Explanation:

The planned value is the worth of the project if it were on time. In this instance, the project should be 50 percent complete, so the planned value is half of the project budget - \$2,250,000. Planned value (PV) is the authorized budget assigned to the schedule work to be accomplished for a schedule activity or work breakdown structure component. It serves as a baseline against which actual performance is measured.

The theory of planned value is of vital importance to the project management team and it is important to keep careful track of this. The term planned value can also be in some situations referred to by the project management team and the project management team leader as the budgeted cost of work scheduled (BCWS).

Incorrect Answers:

- A: This is the earned value for the project.
- B: There is enough information to know.
- C: This is the budget at completion.

NEW QUESTION: 4

Which of these statements is true concerning the data center access layer design?

- A.** With Layer 2 access, the default gateway for the servers can be configured at the access or aggregation layer.
- B.** The access layer in the data center is typically built at Layer 3, which allows for better sharing of services across multiple servers.
- C.** A dual-homing NIC requires a VLAN or trunk between the two access switches to support the dual IP addresses on the two server links to two separate switches.
- D.** The access layer is normally not required, as dual homing is standard from the servers to the aggregation layer.

Answer: A

Explanation:

Explanation/Reference:

Explanation: With Layer 2 / 3, capabilities in-built access layer switches can have data & voice VLANs with interfaces; this is helpful in improving routing convergence.
