**NEW QUESTION: 3**

Which of the following is the GREATEST security risk of two or more companies working together under a Memorandum of Understanding?

- A. MOUs are generally loose agreements and therefore may not have strict guidelines in place to protect sensitive data between the two entities.
- B. MOUs between two companies working together cannot be held to the same legal standards as SLAs.
- C. Budgetary considerations may not have been written into the

MOU, leaving an entity to absorb more cost than intended at signing.

**D.** MOUs have strict policies in place for services performed between the entities and the penalties for compromising a partner are high.

**Answer: A**

Explanation:

The Memorandum of Understanding This document is used in many settings in the information industry. It is a brief summary of which party is responsible for what portion of the work. For example, Company A may be responsible for maintaining the database server and Company B may be responsible for telecommunications. MOUs are not legally binding but they carry a degree of seriousness and mutual respect, stronger than a gentlemen's agreement. Often, MOUs are the first steps towards a legal contract.
