Explanation:

For a site to site VPN, you need a local gateway, a gateway subnet, a VPN gateway, and a connection to connect the local gateway and the VPN gateway. That would be four answers in this question. However, the question states that VNet1 connects to your on-premises network by using Azure ExpressRoute. For an ExpressRoute connection, VNET1 must already be configured with a gateway subnet so we don't need another one.

Explanation:

To calculate the breakeven quantity for a product, use the following equation: $\{\text{Fixed operating costs} / [\text{avg. sales price per unit} - \text{variable cost per unit}]\}$. To determine the total fixed production cost of this product, we must rearrange the standard equation using algebra, in a manner such that the resulting equation resembles the following: $[\$167.75 - \$100.50]$

* $15,985 \text{ units} = X$ Solving for X, which represents the total fixed production costs, yields an answer of \$1,075,000.
