NEW QUESTION: 2

Your network contains an Active Directory domain named contoso.com.

Your company hires 500 temporary employees for the summer. The human resources department gives you a Microsoft Excel document that contains a list of the temporary employees. You need to automate the creation of user accounts for the 500 temporary employees.

Which tool should you use?

- A. ADSI Edit
- B. The csvde.exe command
- C. Active Directory Users and Computers
- D. The Add-Member cmdlet

Answer: B

Explanation:

Explanation/Reference:

Explanation:

Csvde.exe is the best option to add multiple users. As you just need to export the excel spreadsheet as a csv file and make sure the parameters are correct.

You can use Csvde to import and export Active Directory data that uses the comma-separated value format.

Use a spreadsheet program such as Microsoft Excel to open this .csv file and view the header and value information.

The CSVDE is a command-line utility that can create new AD DS objects by importing information from a comma-separated value (.csv) file. This would be the least amount of administrative effort in this case especially considering that these would be temporary employees.
