Are you looking forward to getting good salaries, This IBM C1000-119 updated exam cert is perfectly designed for you to learn technology skills and gain a certificate which is not so easy to get.

Our working staff, considered as the world-class **C1000-119 Testking Learning Materials** workforce, has been persisting in researching IBM Cloud Professional SRE v2 exam study material for many years.

NEW QUESTION: 1

Which one of these features is NOT associated with the Check Point URL Filtering and Application Control Blade?

- A.** Configure rules to limit the available network bandwidth for specified users or groups.
- B.** Make rules to allow or block applications and Internet sites for individual applications, categories, and risk levels.
- C.** Detects and blocks malware by correlating multiple detection engines before users are affected.
- D.** Use UserCheck to help users understand that certain websites are against the company's security policy.

Answer: C

Explanation:

Use the URL Filtering and Application Control Software Blades to:

Create a Granular Policy - Make rules to allow or block applications and Internet sites for individual applications, categories, and risk levels. You can also create an HTTPS policy that enables Security Gateways to inspect HTTPS traffic and prevent security risks related to the SSL protocol.

Manage Bandwidth Consumption - Configure rules to limit the available network bandwidth for specified users or groups. You can define separate limits for uploading and downloading.

Keep Your Policies Updated - The Application Database is updated regularly, which helps you make sure that your Internet security policy has the newest applications and website categories. Security Gateways connect to the Check Point Online Web Service to identify new social networking widgets and website categories.

Communicate with Users - UserCheck objects add flexibility to URL Filtering and Application Control and let the Security Gateways communicate with users. UserCheck helps users understand that certain websites are against the company's security policy. It also tells users about the changes in Internet policy related to websites and applications.

NEW QUESTION: 2

Which of the following is a valid URL filtering rule? (Select two.)

- A. `url-filtering rule allow http://www.example.com`
- B. `url-filtering rule allow http://www.example.com/*`
- C. `url-filtering rule allow http://www.example.com/*.*`
- D. `url-filtering rule allow http://www.example.com/*.*.*`

Answer: D

NEW QUESTION: 3

Which of the following is a valid URL filtering rule? (Select two.)

- A. `url-filtering rule allow http://www.example.com`
- B. `url-filtering rule allow http://www.example.com/*`

Answer: B
