NEW QUESTION: 3 Answer: Explanation:ExplanationBox 1: Delete all AppLocker rules.Box 2: Disable the Application Identity service.Box 3: Run the gpupdate /force command.Note:* Before you can enforce AppLocker policies, you must start the Application Identity service by using the Services snap-in console.* The Application Identity service determines and verifies the identity of an application. Stopping this service will prevent AppLocker policies from being enforced.The gpresult command is used to display the Resultant Set of Policy (RSOP) information for a remote user and computer. And used in conjunction with the /v parameter - it displays verbose policy information. This includes detailed settings that were applied with a precedence of 1.References:
