### **NEW QUESTION: 3**

Identify the operation that ensures that referential integrity is maintained while loading changes detected by the ODI CDC framework.

- A. Purge Journal
- B. Extend Window
- C. Unlock Subscriber
- D. Lock Subscriber

**Answer: B**

Explanation:

Extend Window: The Consistency Window is a range of available changes in all the tables of the consistency set for which the insert/update/delete are possible without violating referential integrity. The extend window operation (re)computes this window to take into account new changes captured since the latest Extend Window operation. This operation is implemented using a package step with the Journalizing Model Type. This operation can be scheduled separately from other journalizing operations.
