Our preparation material for D-VXR-OE-23 Dell VxRail Operate 2023 is duly prepared by the subject matter experts and available in two easy formats, including PDF and Practice exam questions.

**NEW QUESTION: 1** You have a Microsoft 365 Enterprise E5 subscription. You need to enforce multi-factor authentication on all cloud-based applications for the users in the finance department. What should you do? **A.** Create an activity policy. **B.** Create a session policy. **C.** Create a new app registration. **D.** Create a conditional access policy. **Answer: D** **Explanation:** Explanation You can configure a conditional access policy that applies to the Finance department users. The policy can be configured to 'Allow access' but with multi-factor authentication as a requirement. The reference below explains how to create a conditional access policy that requires MFA for all users. To apply the policy to finance users only, you would select Users and Group in the Include section instead of All Users and then specify the finance department group. Reference: <https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/howto-conditional-access-policy-all-u>

**NEW QUESTION: 2** When does space reclamation for a column-organized table normally occur? **A.** After all rows in an extent have been updated. **B.** After all rows in an extent where updates took place have been deleted. **C.** Whenever an individual row is deleted. **D.** Whenever an individual row is updated. **Answer: C**

**NEW QUESTION: 3** **A.** Option C **B.** Option A **C.** Option D **D.** Option B **Answer: B, D** **Explanation:** Three-way mirroring are available in Windows Server 2012 through Storage Space. The new NIC Teaming capability in the Windows Server 2012 bring continuous network availability and increased network performance, supporting greater VM density and lower operational costs. **Incorrect:** Not C: Windows Server 2012 runs only on x64 processors. Unlike its predecessor, Windows Server 2012 does not support Itanium. **Note:** x86-64 (also known as x64, x86\_64 and amd64) is the 64-bit version of the x86 instruction set. It supports vastly larger amounts of virtual memory and physical memory than is possible on its predecessors, allowing programs to store larger amounts of data in memory. x86-64 also provides 64-bit general purpose registers and numerous other enhancements. **Not D:** \*Windows Backup has not supported backing up to tape for quite sometime now. You'll need something like Microsoft's Data Protection Manager or a 3rd party solution. \*You can no longer back up to tape. Windows Server Backup supports backing up to external and internal disks, DVDs, and shared folders.

**NEW QUESTION: 4** You've been reviewing your security checklist and one of the items calls for reviewing the /etc/passwd file. You cat the file and notice that, while most users have an x in the second column, a few have a 14 character string in the second column. What action, if any, should you take? **A.** Use the passwd program to give the users with the hashed passwords new passwords. **B.** Use the passwd program to give the users with the x new passwords. **C.** No action. Linux knows how to handle the

situation and allow user logins.**D.** Run pwconv to convert the unix passwords to shadow passwords.**E.** No action. The users with an x have their accounts locked.**Answer: D**
