NEW QUESTION: 1

Amazon EC2 instances are categorized into four types: On-Demand instances, Reserved Instances, Spot Instances, and Dedicated Hosts. On-Demand instances are the most flexible and are available in all AWS Regions. Reserved Instances provide a significant discount (up to 75%) compared to On-Demand instances in exchange for a 1-year or 3-year commitment. Spot Instances are spare Amazon EC2 capacity that is available at a steep discount (up to 90%) compared to On-Demand instances. Dedicated Hosts are physical servers that are dedicated to running Amazon EC2 instances. They are useful for applications that require a consistent hardware configuration or have specific hardware requirements.

You have just received some room and WiFi access control recommendations from a security consulting company. Click on each building to bring up available security controls. Please implement the following requirements:

The Chief Executive Officer's (CEO) office had multiple redundant security measures installed on the door to the office. Remove unnecessary redundancies to deploy three-factor authentication, while retaining the expensive iris scanner.

The Public Cafe has wireless available to customers. You need to secure the WAP with WPA and place a passphrase on the customer receipts.

In the Data Center you need to include authentication from the "something you know" category and take advantage of the existing smartcard reader on the door.

In the Help Desk Office, you need to require single factor authentication through the use of physical tokens given to guests by the receptionist.

The PII Office has redundant security measures in place. You need to eliminate the redundancy while maintaining three-factor authentication and retaining the more expensive controls.

Instructions: The original security controls for each office
