Answer: B

NEW QUESTION: 3

Which statement is correct about 802.1X authentication?

- A.** In a wireless network, 802.1x authentication must occur before an 802.11 association method can occur.
- B.** The user must provide a valid user certificate to be allowed access to a LAN.
- C.** A network access device, such as a wireless access point, authenticates the user credentials.
- D.** Keys used for data encryption after authentication can be generated dynamically.

Answer: D

NEW QUESTION: 4

A large mobile telephony and data network operator has a data center that houses network elements. These are essentially large computers running on Linux. The perimeter of the data center is secured with firewalls and IPS systems.

What is the best security policy concerning this setup?

- A.** Network elements must be hardened with user ids and strong passwords. Regular security tests and audits should be performed.
- B.** The operator knows that attacks and down time are inevitable and should have a backup site.
- C.** As long as the physical access to the network elements is restricted, there is no need for additional measures.
- D.** There is no need for specific security measures on the

network elements as long as firewalls and IPS systems exist.

Answer: A
