Answer: A

NEW QUESTION: 2
Your company has evaluated NetApp SaaS Backup for Microsoft Office 365 with a trial account. In the evaluation period, you used Amazon S3 that was provided by SaaS Backup as the destination for your backup. After evaluation, your company decided to use Bring Your Own Storage (BYOS) as a backup destination. You determine that none of your previous data is showing up.
What caused this problem?
A. Changing the destination to BYOS did not migrate the data.
B. During the change from evaluation to licensed, the access token expired.
C. Upgrading from evaluation to licensed reset your SaaS Backup account.
D. When upgrading from trial to licensed, data was not preserved.
Answer: C

NEW QUESTION: 4
A union is performing a jurisdictional strike in front of a construction site. What is a jurisdictional strike?
A. It is a strike through which the union seeks to pressurize an employer to assign a particular work to its members; rather than to members of other unions or to the non-union workers.
B. It is a strike through which the union seeks to pressurize an employer to agree to the terms of a new contract because the current contract between the employer and the union has expired.
C. It is a strike through which the union seeks to pressurize an employer to agree to the terms of a new contract although there is already an approved contract in place.
D. It is a strike through which the union seeks to pressurize an employer to assign all work to its members, rather than to members of non-union workers.
Answer: A
Explanation:
Explanation/Reference:
Answer option A is correct.
A jurisdictional strike is an effort by the union to get the employer to assign specific work to the union rather than to other unions or even non-union workers.
Answer option B is incorrect. This isn't a valid definition of a jurisdictional strike.
Answer option C is incorrect. This isn't a valid definition of a jurisdictional strike.
Answer option D is incorrect. This answer is close, but not the best choice. Note that the answer requests all work, not just particular work.
