#### **NEW QUESTION: 2**

SIMULATION

Fill in the blank with an appropriate security type. applies the internal security policies of the software applications when they are deployed.

#### **Answer:**

Explanation:

Programmatic security

Explanation/Reference:

Explanation: Programmatic security applies the internal security policies of the software applications when they are deployed. In this type of security, the code of the software application controls the security behavior, and authentication decisions are made based on the business logic, such as the user role or the task performed by the user in a specific security context.

**NEW QUESTION: 3**

ExecuteCommandProcedure

**Answer:**
