Welches der folgenden Prinzipien sollte bei der Einführung eines Testwerkzeugs in eine Organisation beachtet werden?

- (i) Bewertung der organisatorischen Reife, um festzustellen, ob ein Tool den erwarteten Nutzen bringt.
  - (ii) Erfordernis einer schnellen Amortisation der ursprünglichen Investition.

- A. (i) und (ii)
  - B. (ii) und (iii)
  - C. (iii) und (iv)
  - D. (i) und (iv)

**Answer: D**

Explanation:

Assessing organizational maturity (i) is very important when deciding whether to introduce a test tool, as implementing a tool in an immature test organization with poor processes is unlikely to produce any benefits.

A quick return on the initial investment (ii) in a test tool is rare.

Having a requirement that a tool should be easy to use for untrained and unskilled testers (iii) is generally a false hope. This is comparable with expecting someone who has never driven a car to be able to drive safely and effectively.

Agreeing requirements before evaluating tools (iv) is essential. Not to do so would be comparable with building and testing a system without requirements.

In conclusion, (i) and (iv) are good principles to follow when introducing a tool and (ii) and (iii) are not.
