NEW QUESTION: 2 Which three statements are true about using flashback database in a multitenant container database (CDB)? **A.** To enable flashback database, the CDB must be mounted. **B.** The root container can be flashed back without flashing back the pluggable databases (PDBs). **C.** Individual PDBs can be flashed back without flashing back the entire CDB. **D.** The DB_FLASHBACK_RETENTION_TARGET parameter must be set to enable flashback of the CDB. **E.** A CDB can be flashed back specifying the desired target point in time or an SCN, but not a restore point. **Answer: C, D, E** Explanation: C: *RMAN provides support for point-in-time recovery for one or more pluggable databases (PDBs). The process of performing recovery is similar to that of DBPITR. You use the RECOVER command to perform point-in-time recovery of one or more PDBs. However, to recover PDBs, you must connect to the root as a user with SYSDBA or SYSBACKUP privilege

D:DB_FLASHBACK_RETENTION_TARGET specifies the upper limit (in minutes) on how far back in time the database may be flashed back. How far back one can flashback a database depends on how much flashback data Oracle has kept in the flash recovery area. Range of values 0 to 231 - 1 Note: Reference; Oracle Database, Backup and Recovery User's Guide 12c

NEW QUESTION: 3 You are developing an application by using the Microsoft .Net SDK. The application will access data from a Microsoft Azure Data lake folder. You plan to authenticate the application by using service to service authentication. You need to ensure that the application can access the Data lake folder. Which three actions should you perform? Each correct answer presents part of the solution. **A.** Configure the application to use the application ID, authentication key, and tenant ID **B.** Assign the Azure Active Directory app permission to the Data lake Store folder **C.** Configure the application to use the OAuth 2.0 token endpoint **D.** Register an Azure Active Directory app that uses the Native application type **E.** Register an Azure Active Directory app that uses the Web app/API application type **F.** Configure the application to use the application ID and redirect URI. **Answer: C,D,E**
