NEW QUESTION: 3

Sie verwalten eine Microsoft SQL Server 2014-Datenbank. Sie haben eine SQL Server-Agent-Jobinstanz, die mit dem Dienstkonto ausgeführt wird. Sie haben einen Auftragschritt innerhalb des Auftrags, für den erweiterte Berechtigungen erforderlich sind.

Sie müssen sicherstellen, dass der Auftragschritt mit einem anderen Benutzerkonto ausgeführt werden kann.

Was solltest du verwenden?

- A. ein Proxy
- B. ein Zeitplan
- C. eine Warnung
- D. ein Operator

Answer: A

Explanation:

A SQL Server Agent proxy defines the security context for a job step. A proxy provides SQL Server Agent with access to the security credentials for a Microsoft Windows user. Each proxy can be associated with one or more subsystems. A job step that uses the proxy can access the specified subsystems by using the security context of the Windows user. Before SQL Server Agent runs a job step that uses a proxy, SQL Server Agent impersonates the credentials defined in the proxy, and then runs the job step by using that security context.
